# What is PROINVERSION?

In the realm of international investment, the Private Investment Promotion Agency – PROINVERSION, emerges as a powerful engine for foreign investors looking to explore Peru's prosperous economic landscape. Since its establishment in 2002, PROINVERSIÓN has successfully led the promotion of private investment in the country, nurturing a favorable environment for collaboration and growth through Public-Private Partnerships (PPP), Projects in Assets (PA), and Works for Taxes (OxI). This technical entity, PROINVERSIÓN, operates autonomously in legal, technical, functional, administrative, economic, and financial matters. Its mission is to drive private investment to strengthen Peru's infrastructure and public services, guided by principles of technical leadership, transparency, and quality. For foreign investors, PROINVERSIÓN is the bridge that connects to the country's growth opportunities by managing major projects assigned by various levels of government.

In summary, the Private Investment Promotion Agency - PROINVERSIÓN stands as a guiding light leading foreign investors towards boundless possibilities in Peru. Its operational independence, project portfolio, and transparent focus create the perfect stage for mutually beneficial collaboration. As we move towards our vision of being recognized as strategic partner for both investors and national development, we extend an invitation to foreign investors to join us in building a more promising and brighter future for both Peru and its people.

# Why invest in Peru?

At PROINVERSIÓN, the aim of providing a comprehensive overview of Peru's strengths as an investment destination is highlighted by the continuous growth of the Gross Domestic Product (GDP), which according to the IMF has positioned the country as the second-fastest-growing economy in Latin America over the past two decades, accumulating a robust 4.3%. Furthermore, sustained growth is projected, with an estimated 3.5% for 2024. This progress is underpinned by an effective exchange rate policy that has kept our currency's appreciation at just 8% compared to multilateral exchange rate index in the region. Strong fiscal health also forms a fundamental pillar in this scenario. Peru boasts the lowest gross public debt in the region, and we are on track to further reduce this indicator, projecting it to be 31% as a percentage of GDP by 2024. This solid foundation provides a conducive environment for investment projects. Macroeconomic stability, supported by controlled inflation rates gradually moving towards their established targets, and a trade surplus built on effective trade policies, reaffirm confidence in the country.

Additionally, Peru is focused on boosting infrastructure and strengthening critical sectors such as electric energy and health. As a proof that we are moving in this direction, we have awarded prominent projects such as the 500kv Piura Nueva-Frontera substation and the AWS-3 and 2-3 GHz broadband expansion, with total investments nearing USD 800 million. These examples reflect our long-term vision and unwavering commitment to equitably distribute the benefits of projects. This perspective, supported by a strong macroeconomic environment, lays the solid groundwork for strategic investments. Such investments not only contribute to the country's sustainable development but also open the door to attractive opportunities backed by tangible data for investors.

# PUERTO MALDONADO WASTEWATER TREATMENT PLANT

## DESCRIPTION

The project consists of designing, financing, constructing, rehabilitating, expanding, operating and maintaining the municipal wastewater collection, treatment and disposal systems in the city of Puerto Maldonado, as well as monitoring and controlling the maximum allowable values.

## MAIN WORKS

Wastewater Treatment Plant (Qp:400 L/s)  
Sewerage connections (13.808 units) Primary collectors (171,3 km) Secondary collectors (20,9 km)M. Pumping stations (7 units) and Driving lines (4,4 km).

# HEADWORKS AND CONDUCTION WORKS FOR THE DRINKING WATER SUPPLY IN LIMA

## DESCRIPTION

The project includes the design, financing, construction, operation and maintenance of new and existing works to increase the availability of drinking water to expand and improve service to 1.5 million inhabitants in the East and South of Lima.

## MAIN WORKS

Improvement of Pomacocha and Huallacocha Bajo Dams (38 million m<sup>3</sup>), Trans-Andean Tunnel (10 km), Huachipa II Plant: Phase 1 of 2,5 m<sup>3</sup>/s and Phase 2 of 5 m<sup>3</sup>/s, Huachipa Main Reservoir (160.000 m<sup>3</sup>), 26 km South Branch with 5 reservoirs (69.000 m<sup>3</sup>) and Interconnection lines (60 km).

## STRUCTURING STAGE

# WASTEWATER TREATMENT FOR FINAL DISPOSAL AND/ OR REUSE PROVINCE OF CHINCHA

## DESCRIPTION

The project proposes to optimize the final wastewater collection system by redirecting the flow to 2 new WWTPs. Its main objective is to increase the adequate treatment of wastewater in the area of operation of the Service Provider Company for the province of Chincha, improving the quality of life of the families living in the area of operation.

## MAIN WORKS

15 km of interceptor and collector lines, 1 pumping chamber, 6 km of drive lines, 2 outfalls with a total length of 7,7 km, 2 wastewater treatment plants with a total of capacity of 0,6 m<sup>3</sup>/s and closure of 4 WWTP (lakes).(4,4 km).

## STRUCTURING STAGE

# HUANCAYO WASTEWATER TREATMENT PLANT

## DESCRIPTION

The project contemplates the construction of a wastewater treatment plant (WWTP) produced in the localities of Huancayo, El Tambo, Chilca and Huancán. It also includes the construction of a WWTP of approximately 34 kilometers of primary and secondary collectors that will intercept the current discharges to the Mantaro, Chilca and Ancalá rivers; these will carry the wastewater to the WWTP, including 8 wastewater pumping stations (EBAR) and their respective discharge lines.

## MAIN WORKS

35 km of collectors and drive lines, 8 wastewater pumping stations and 1 wastewater treatment plant (approx. 1m3/s).

## FORMULATION STAGE

### ILO DESALINATION PLANT

#### DESCRIPTION

The project seeks to improve the quality of life of the population of Ilo by desalinating seawater for drinking water service. It will cover the unmet demand for drinking water, provide continuity of service (24 hours) and increase the quality of service, complying with the standards and technical regulations of the Sanitation Sector.

#### MAIN WORKS

Two water resources: Pasto Grande Catchment (211 l/s) and Seawater Catchment: (432.93 l/s), improvement and expansion of the Pampa Inalámbrica WWTP, construction of the Desalination Plant of 432.93 l/s, improvement of the existing system pipelines: 6890 m, improvement of existing drives and improvement and rehabilitation works on existing reservoirs.

## FORMULATION STAGE

# LAMBAYEQUE DESALINATION PLANT

## DESCRIPTION

The project consists of the design, construction, operation and maintenance of drinking water production infrastructure to improve the quality of life of the urban population of the districts of Lambayeque and San José, through the seawater desalination. The objective is to meet the demand for drinking water service of the beneficiary population and to improve the quality of drinking water service by providing drinking water 24 hours a day.

## MAIN WORKS

The construction of a drinking water treatment plant is anticipated, which will use reverse osmosis filtration modules. In addition to the rehabilitation and expansion of the primary distribution networks. (Technical components under study). Disposal of excreta system for each family in the project.

## PLANNING AND PROGRAMMING STAGE

### PAITA - TALARA DESALINATION PLANT and WASTEWATER TREATMENT FOR TALARA

#### DESCRIPTION

The project aims to meet the water demand of the population of the 13 districts of the provinces of Paita and Talara in terms of water quality and service, providing 24 hours a day, through seawater desalination and meeting the technical standards of the Sanitation Sector.

#### MAIN WORKS

Two potential water resources to capture 2 m<sup>3</sup>/s of water: Chira River catchment and/or Seawater Catchment, improvement and expansion of the El Arenal WWTP and/or construction of Desalination Plants (2 m<sup>3</sup>/s), Improvement works and installation of driving lines and wastewater treatment plants for 6 districts of province of Talara.

than US\$ 4,3 billion in 2 projects

## PLANNING AND PROGRAMMING STAGE

# MASSIFICATION OF THE USE OF NATURAL GAS NATIONWIDE IN THE SOUTHWEST CONCESSION

## DESCRIPTION

The project consists of providing the natural gas distribution service through a pipeline network in the concession areas, for which the following infrastructure is contemplated:

Land transportation of Liquefied Natural Gas (LNG) or Compressed Natural Gas (CNG) from the Supply Points.

- District stations that include an LNG reception, storage and regasification system or CNG decompression system, and regulation, measurement and odorization stations, to be located in the cities to be supplied.
- Natural gas distribution system through a pipeline network to supply end users.

## **FORMULATION STAGE**

# **INTEGRATED GAS TRANSPORTATION SYSTEM – SOUTHERN ZONE OF PERU**

## **DESCRIPTION**

This encompasses a natural gas and natural gas liquid transportation system, which will provide supply security to users of the National Interconnected Electric System and the Natural Gas (GN) and Liquefied Natural Gas (GNL) system, known as “Energy Security.” It also aims to cover the supply of GN and GNL to users in the major cities of the southern zone of Peru and the Energy Node in Mollendo (Puerto Bravo Power Plant) and Ilo (Ilo Power Plant).

The project will be carried out in two (2) stages: During STAGE I, activities included: diagnosis, demand analysis, supply analysis, technical analysis of alternative solutions, costs at market prices, social evaluation, sensitivity analysis, probabilistic risk analysis of social profitability, and sustainability analysis. This stage was completed in October 2020.

STAGE II will involve the development of the technical alternative solution selected in Stage I of the Pre-Investment Study, based on the criteria established in Invierte.pe.

**Project Sheet**

An aerial photograph showing a river with white water rapids flowing through a rocky landscape. A concrete bridge with a yellow center line spans the river. The image is split diagonally, with the top-left portion showing the natural landscape and the bottom-right portion being a dark blue overlay with a faint world map pattern.

# SAN JUAN DE MARCONA NEW PORT

## DESCRIPTION

It includes the design, financing, construction, operation and maintenance of a new port terminal for public use with international standards, specialized in providing storage and shipping services for iron and copper concentrates, handling up to 47 million MT of minerals and supplies from the main mining projects in the area. Likewise, it is expected to handle liquid bulk cargo, general cargo, including containers, derived from the needs of mining production in the area.

## MAIN WORKS

Works related to the construction and operation of the new port terminal. Operation and maintenance according to the standards and service levels: waiting time per vessel, boarding start time and productivity indicators established in the concession contract.

## Project Sheet

**Self-financed unsolicited proposal**

**Declaration of interest date:**

II Quarter 2024

Contract term: undefined

**Investment Amount:** 172 US\$ MM

## FORMULATION STAGE

# COMPREHENSIVE WATER SYSTEM OF THE CHANCAY VALLEY - LAMBAYEQUE

## DESCRIPTION

It involves the design, construction, and operation of the comprehensive water system in the Chancay-Lambayeque Valley. This includes the construction of two dams (Montería and Sicán) and the execution of conveyance and distribution works to irrigate 33,200 new hectares. Additionally, it will encompass the operation and maintenance of existing structures (currently under the management of PEOT). Currently, efforts are being made to negotiate the signing of the Institutional Collaboration Agreement between GORE LAMBAYEQUE, MIDAGRI, and PROINVERSIÓN, which, among other aspects, will allow changes in the scope of the IPC (Private Investment Promotion).
